SPECIALY DESIGNED ONLINE PRINTING & ADHESIVE COATING MACHINE PRINTER COATER

MODEL CMP, CM2P, CM3P & CM4P

AVAILABLE IN WORKING WIDTH FROM 600 MM TO 1600 MM

Used for Printing in multicolor on BOPP Film on same side as of Adhesive coating. Both process are done in one pass. Reducing process wastage & superior quality of Tape.

This process of Sandwich Printing i.e. Printing of logo sandwiched between Film/Foil & Adhesive/Glue.

The most advance system of Sandwich Printing gives excellent quality of printing & high gloss.

Machine also equipped with online Corona Treatment before doing printing & adhesive coating on BOPP Tapes.

For Unwinder & Rewinder turret system for auto change over. This helps to run the machine nonstop without stoppage for loading & unloading of rolls. You can set desired length & it will automatically change the roll. Reducing manpower & machine can be practically run by on 2 persons.

Machine Specifications.

Web Width.	600 mm to 1600 mm.
Working Speed.	Up to 100 MPM
Unwinder.	With Auto Turret 3" & 6" shafts. Auto Tension control.
Corona Treator.	Fully programmable system. Also available Auto speed to currant on demand.
Printing Station.	Flexographic Or Rotogravure both options. Available in 1,2,3,4 colors. Separate drying Chamber for printing.
Adhesive Coating.	Most advanced coating station with kiss Coating. Duel Mayer Bar system.
Drying Chamber.	Pneumatically opening with sequence air Flow system. For max. speed. Available with Oil/Gas or Electrical heating. Separate Exhaust.
Web Guide.	Electronic web guide system.
Chiller.	Chiller roller for high speed.
Winder.	With Auto Turret 3" & 6" shafts. Auto Tension control.
Control Panel.	Fully programmable Siemens Drives with PLC & HMI.
